

How to avoid “Juice Hacking” USB Port Scams at Airports

Consider carrying a charging-only cable, which prevents data sending or receiving while charging.

These charging only cables are inexpensive and do not allow data to be transferred while charging your device.

Shop news:

35 members were helped during April. 149 were helped January through April.

Membership

The Club has 276 households with 473 individual members. New members since the last newsletter:

C.S. Sipe, Jr.

Sandy and Eddie Twisdale

Scooter and Carla Bohan

iWatch OS 11.5

June 10th Meeting

We will have our yearly June ice cream social, and a very special presentation from the LGA's Brian Goldsworthy on how they are using technology to keep our lake clean of invasive weed. The press will be invited, and we hope to attract additional guests. Mark your calendar!

Linux Mint actually comes with a demo!

You can test run Linux Mint on your laptop or desktop without disturbing your Windows 10 Operating System! Come to the September member meeting and witness Don and Mark from our shop as they demo Linux Mint. It is free, and it also runs a free equivalent of Microsoft Office!

May 13th Meeting Recap

Cutting the cord

(LARRY JAVA COVERED
STREAMING VS CABLE.

Larry gave a very interesting demonstration of the various options you have for streaming depending on your location. His presentation with links is available for all to use.

Windows 10

After October 14, 2025, the Windows 10 Operating System will continue to work but will no longer receive general security patches, feature updates, or technical support.

Microsoft will offer an Extended Security Update (ESL) program which will cost \$30 for one additional year for continued critical and important security updates until October 14, 2026.

Microsoft Defender/Security is a separate anti-malware program for Windows 10, and it will continue to get virus definition updates for free until at least October 14, 2028.

So, what does all of that mean for you?

Your computer will still run,
but it will be more
vulnerable to security risks.
